Outline

1 Introduction

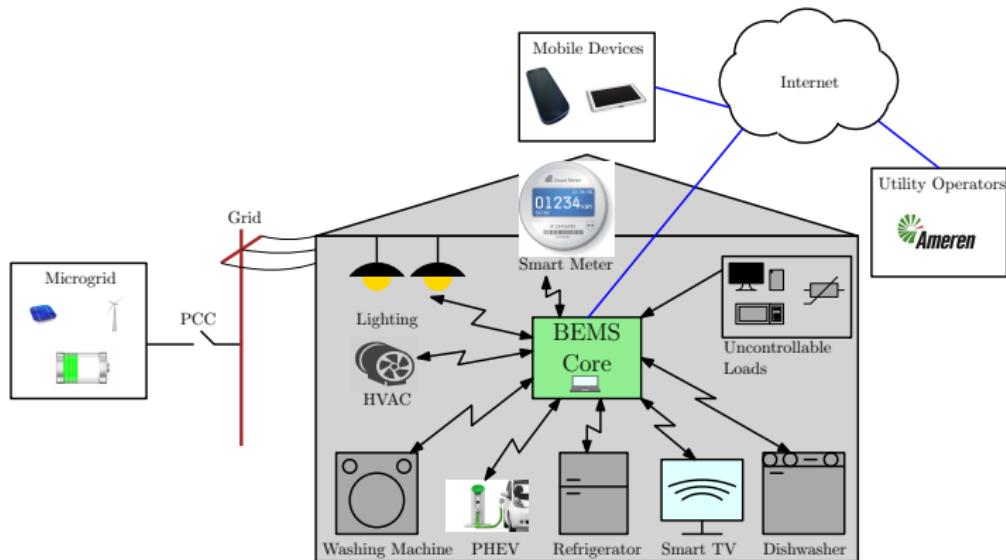

2 Progress

3 Plans

Introduction

Introduction

Progress

- Implemented an auto-discovery feature where all supported devices will be scanned
- Began work on adding support for toggling the WeMo Switch

Demo

Plans

- Determine how to pass data between the web server and the Control Agent
- May consider using a different communication method than publish/subscribe
- Work on querying the device for power consumption data
- Render the power data to the UI in the form of text and a plot
- Research and set up time series database
- Determine what to work on after the switch has been fully implemented

Any Questions?
